AYVAZ®

SK-51

FLOAT TYPE STEAM TRAP

GENERAL FEATURES

Ayvaz SK-51 float steam traps especially perform continual evacuation at the steam saturation temperature. Ayvaz SK-51 doesn't affect instantaneous and large pressure shift. SK-51 is mainly applied at the systems where the condensate is evacuated rapidly and it is also ideal for automatic temperature control system.

Installation:
SK-51 can be used vertically as the inlet to stay up the top and the outlet to remain at the bottom. It can also be installed horizontally from right to the left or opposite way. If it is not indicated differently in the order sheet, it will be assumed as right to the left. Will be assumed as right to the left. Cover part can be arranged according to horizontal or vertical installation type.

SK51   (1/2" - 3/4"- 1")

Differential Pressure

ΔP = Inlet Pressure / Outlet Pressure

OPERATING CONDITIONS	
Max. Operating Pressure	16 bar
Max.Differential Pressure (ΔP)	4.5-10-14 bar
Max. Operating Temperature	250 °C
